Totalrecall Publications, United States, 2012. Paperback. Book Condition: New. 224 x 147 mm. Language: English . Brand New Book ***** Print on Demand *****.It is this author s contention that elastic communication may explain the connection between four fundamental forces; in gravitational, electromagnetic, strong and weak; and may provide for an alternative method of explaining and predicting both inter and intra-atomic changes. The information provided in this book provides for a new theory of entanglement. Mark B. Alan calls it Elastic Communication. This new theory allows for temporary tensions to be created, in fields between entities that present with a symmetry of conditions. The process of creating tensions then repeats itself, over and over again as the duration of the primary tension lasts; and as conditions affording symmetry exist. In this title Mark discusses four primary elastic fields; arising in succession, and arising as a product of another field. Additional fields are also discussed.
