

## Bulletin Volume 90-114

By Rhode Island Agricultural Station

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .good stand of timothy has been maintained throughout, these results are of much interest. This is particularly the case when it is stated that the condition of the plot receiving the full amount of nitrogen is nearly as promising after cutting the crop of 1904 as it was a year earlier. The full details of the first four years of the experiment are to be found in Bulletins Nos. 57, 71, 82, and 90 of this Station. It should be repeated here that the three plots (Nos. 17, 19, and 21) were all seeded in the same manner in the spring of 1898, using barley as a nurse crop. Clover and grass seed were used as follows: Per Acre. 7.5 pounds common red clover (*Trifolium pratense*. L.). 15.0 pounds timothy (*Phleum pratense*. L.) 7.5 pounds redtop (*Agrostis alba*, var. *vulgaris*. Thurb.) The phosphoric acid has been...
